

ADDITIONAL POSITIONS

In addition to the **14** positions mentioned in the Call, there will be **3** additional positions in collaboration with external companies on the following research lines:

1. RSE S.p.A. - Ricerca sul Sistema Energetico Comunicazione Quantistica per Sistemi Elettrici (Stefano Olivares);
2. Algorithmiq Ltd - Efficient classical simulation of near-term quantum computers with tensor networks, with applications to quantum chemistry simulations (Dario Tamascelli);
3. Pirelli Tyre - Valutazione e caratterizzazione di PM provenienti da sorgenti non-exhaust stradali (Roberta Vecchi).

And a further position on an ERC project:

1. "DiscEvo_Rebuilding the foundations of planet formation: proto-planetary disc evolution" (Giovanni Rosotti).

Potential candidates are invited to contact the research PIs for more details. Applications should be presented following the same procedure of other positions.
