

# PHYSICS COLLOQUIA 2025

APR  
08

**ELIGIO LISI** | INFN, Bari (ITA)

## Unveiling Fundamental Neutrino Properties

3:00 pm | Classroom A | Via Celoria 16 | Milan

In this colloquium, I shall review the present understanding of neutrino flavor states as superpositions of neutrino mass states, in terms of fundamental mass-mixing parameters probed by a variety of oscillation and nonoscillation phenomena in physics, astrophysics and cosmology. Past results, present hints (or puzzles) and future challenges in this field will be discussed.
