Every candidate will be invited to present on a whiteboard the submitted Research Project in no more than 10 minutes. If necessary, diagrams and/or images contained in the Research Project could be used by the candidate as a reference.

During the oral examination, the candidate will have to focus on the scientific field related to the research project and on his/her own role in the proposal. The presentation will be followed by some questions.

The candidate can choose to have the interview whether in Italian or in English.
